

# GIS Specialist

**Location:** Cape Town

**Ref:** LR15055

**Type:** Permanent

**Industry:** Geospatial

A small, dynamic company that build property related GIS web applications require a GIS Specialist to join their team based in the Southern Suburb of Cape Town. The organisation develops products that relies heavily on GIS web mapping and geo database technologies and therefore require a hard working, dedicated and passionate GIS Specialist to assist them in widening their product offering across South Africa.

This position is for someone with a solid GIS background and experience with the OpenGeo stack. It involves migrating the current database from MySQL to PostgreSQL and setting up GeoServer and implementing web-based mapping.

## Required Skills

- PostgreSQL, PostGIS, PL/pgSQL
- GeoServer, GeoWebCache
- OpenLayers, Google Maps API
- Desktop GIS (QGIS, Manifold)

## Advantage

- Web development with HTML, CSS, JavaScript, jQuery and ASP.NET (VB)
- MySQL

## Other attributes

You need to be a quick learner, natural problem solver, pay high attention to detail and be self-motivated.

**Salary** – R15 to R30k per month, depending on experience

## HOW TO APPLY

- Ensure you meet **all** the requirements
- Complete all the requested information below
- **Remember** to attach your CV
- Once your application has been made, you will receive a generic e-mail to confirm the receipt of your application
- Only short-listed candidates will be contacted
- Should you not be contacted by a consultant within 2 weeks, please consider your application as unsuccessful
